

INFOGRAPHIC Nb 4
Successful treatments of 1160 Mechanical Allodynia

To MD To neuroscientist $\bar{X} = 75\%$
 To patient To therapist

DELLA CASA R, OT, CSTP® & SPICHER CJ

This infographic describes 1160 mechanical allodynia (in $n=875$ NPP) that were completely resolved in each body department, as well as the % of disappearance after DVCS (N=1167 NPP) – DVCS ≡ DISTANT Vibrotactile Counter-Stimulation – NPP ≡ Neuro-pathic Pain Patient – % = completely resolved allodynographies / initial allodynographies – allodyngraphy (plural -ies) ≡ standardized tool to map the borders of the territory where application of a 15g force stimulus on the skin generates a painful response.

Data collected from the 1st of July 2004 to the 6th of April 2018 in the Somatosensory Rehab Ctr (Freiburg – Switzerland)
